ABOUT ME

I'm seeking a Junior Fullstack Developer position to build complete web applications — from backend to interface — using **JavaScript, Node.js, React, HTML, CSS, and SQL**.

I aim to collaborate in agile teams to develop scalable, high-performance, user- centered solutions, delivering seamless and impactful digital experiences.

Graduated in Food Engineering but craftswoman at heart and soul.

I have always worked with carrying and thinking about the well being of who is around me. I am a good communicator and gifted with initiative, focus and perseverance.

Walk my talk is my slogan more like a motivation phrase.

Always curious! In my free time I enjoy traveling, reading novel books, yoga, meditations, tracking and authentic conversations.
